Hey! Turn this over,
check it out, then
have a chat with
your doc.

have you lost your zing?

Do you experience any of the following?

- Feeling tired and unwell
- Poor appetite and indigestion
- Mood swings, anxiety and depression
- Sleeping problems
- Aches, pains and fevers
- Skin rashes and itchy skin
- Dry mouth and mouth ulcers

These could be symptoms of hepatitis C.

Think about getting tested if any of the following apply to you:

- | | YES |
|--|--------------------------|
| • Shared injecting equipment (even once) | <input type="checkbox"/> |
| • Shared any other drug use equipment | <input type="checkbox"/> |
| • Shared a razor, toothbrush, nail clippers, scissors or item that could carry blood | <input type="checkbox"/> |
| • Had a tattoo or body piercings from an unlicensed studio | <input type="checkbox"/> |
| • Cultural practices where blood can be passed on from person to person | <input type="checkbox"/> |
| • Had blood transfusion prior to 1990 | <input type="checkbox"/> |
| • Received blood products prior to 1990 | <input type="checkbox"/> |
| • Had medical/dental procedures overseas | <input type="checkbox"/> |
| • Have spent time in prison | <input type="checkbox"/> |

get your zing back.
hepatitis C is easily curable.
